Workshop

Laying a Foundation:
Defining Arts Integration
Changing Education Through the Arts, part of the Rubenstein Arts Access Program, is generously funded by David M. Rubenstein.

Additional support is provided by Laird Norton Family Foundation, The J. Willard and Alice S. Marriott Foundation, The Morris and Gwendolyn Cafritz Foundation, and the U.S. Department of Education.

Kennedy Center education and related artistic programming is made possible through the generosity of the National Committee for the Performing Arts.

This workshop and accompanying resource materials were developed by Lynne B. Silverstein and Sean Layne for the Education Division of the John F. Kennedy Center for the Performing Arts Washington, D.C.

### Arts Integration Checklist

- Arts Integration Online! 31
- Additional Resources 32

There are three ways the arts are taught in schools.

All the ways the arts are taught in schools (arts as curriculum, arts-enhanced curriculum, and arts-integrated curriculum) are supported by arts experiences—attendance at performances and exhibits by professional artists.

**PURPOSE OF THIS SESSION:**
To explore the defining characteristics of arts integration
The Kennedy Center’s Definition

Arts Integration is an **APPROACH to TEACHING** in which students construct and demonstrate **UNDERSTANDING** through an **ART FORM**. Students engage in a **CREATIVE PROCESS** which **CONNECTS** an art form and another subject area and meets **EVOLVING OBJECTIVES** in both.

More information about this definition is available at https://artsedge.kennedy-center.org/content/arts-integration
Arts and arts integration lessons typically include one or more elements of the creative process.
Engage students in observing, reading, listening, viewing, brainstorming possibilities, looking at the work of professional artists.

Engage students in skill-building within the art form. Demonstrate/model a process or skill. Involve students in a warm-up.

Students make choices and create something as a way to construct and demonstrate their understanding. They do not merely memorize, repeat, or copy. As in any process, the work evolves.

Time is given throughout the process for students’ personal reflections and assessment. This naturally leads to revision.

At some point within a unit, it is appropriate for students to share their work with each other to give and receive feedback. This can take place several times throughout a unit to provide multiple opportunities for feedback.
STUDENTS ENGAGE IN A CREATIVE PROCESS

National Arts Standards for 21st Century Students

- Creating
- Performing, Exhibiting, Presenting
- Responding

www.nationalartstandards.org
Bloom’s Taxonomy of Educational Objectives and Revision by Anderson & Krathwohl

Benjamin Bloom identified six levels of thinking in his 1956 *Taxonomy of Educational Objectives*. In 2001, Anderson and Krathwohl revised Bloom’s Taxonomy.

Creating is the highest level of thinking.

Anderson and Krathwohl updated Bloom’s Taxonomy in three ways:

- They reversed Bloom’s last two stages—Level 5 and Level 6. “Creating” now sits at the highest level of mental functioning as it requires one to put together, reorganize, or synthesize elements in a new form or structure. Anderson and Krathwohl believe that Evaluating, which includes making judgments based on criteria, precedes one’s ability to Create.

- All category titles are changed to indicate verbs/actions rather than nouns.

- In the Level 1 category, Remembering, Anderson and Krathwohl added a fourth knowledge dimension: the metacognitive (knowledge of and awareness of one’s own thinking) to Bloom’s three knowledge dimensions (factual, conceptual, and procedural knowledge).

References
Alignment: Creating in the Arts and ELA Standards

In 2014 the College Board compared the Common Core ELA Anchor Standards with the Core ARTS Anchor Standards.

The ARTS Anchor Standards for CREATING were most strongly aligned with the Common Core Anchor Standards for WRITING.

Of the 30 comparisons that were made between standards, 26 instances of alignment were found.

References
Three Learning Modalities

The phrase “learning modalities” refers to the different ways in which learners acquire, process, and demonstrate what they know.

Visual
(Learn by seeing)

Aural
(Learn by hearing)

Kinesthetic
(Learn by moving, touching)

What makes the arts unique and powerful is that they naturally draw on multiple learning modalities.
Looking Inside the Arts: Examples

**Theater**
- Exploring the Elements of Theater
- Creating through Improvisation
- Directing
- Script Writing
- Creating Monologues
- Creating Dramatization
- Exploring Role Play
- Creating Tableaus
- Creating Readers Theater
- Design: Lighting, Sets, Costume, Make-up, Props
- Watching, Analyzing, and Critiquing Theater
- Examining Genres and Styles
- Exploring Theater as a Reflection of a Culture(s)

**Music**
- Exploring the Elements of Music
- Creating through Improvisation
- Conducting
- Writing Songs
- Exploring Musical Phrasing
- Composing
- Playing Instruments
- Singing
- Listening
- Performing as Part of an Ensemble
- Listening to, Analyzing, and Critiquing Music
- Examining Genres and Styles
- Exploring Music as a Reflection of a Culture(s)

**Dance**
- Exploring the Elements of Dance
- Creating through Improvisation
- Creating Choreography
- Exploring Phrasing
- Creating Dances that Tell Stories
- Communicating through Gesture
- Performing as Part of an Ensemble
- Performing Solo
- Exploring Music for Dance
- Theatrical Aspects of Dance (lighting, sets, costumes, make-up)
- Watching, Analyzing, and Critiquing Dance
- Examining Genres and Styles
- Exploring Dance as a Reflection of a Culture(s)

**Visual Arts**
- Exploring the Elements of Art
- Creating with the Principles of Design
- Creating in a Range of Media:
  - Drawing
  - Sculpture
  - Collage
  - Printmaking
  - Fabric Arts
  - Painting
  - Mask-Making
  - Cartooning
- Creating Exhibits
- Analyzing and Critiquing Works of Visual Art
- Examining Genres and Styles
- Exploring Visual Arts as a Reflection of a Culture(s)
Looking Inside the Arts: Examples

**Storytelling**
- Exploring Story Types (folktales, fairy tales, fables, myths, legends, tall tales, pourquoi “why” tales)
- Writing Stories for Telling
- Developing Storytelling Skills (vocal expression, gesture, eye contact, sound effects, repetition)
- Performing Stories
- Selecting Stories for Telling
- Examining Genres and Styles
- Exploring Storytelling as a Reflection of a Culture(s)

**Puppetry**
- Exploring Puppet Types (hand, rod, shadow, body, marionette)
- Writing Scripts
- Developing Puppetry Skills (voice, gesture, movement, manipulation)
- Creating Sets, Lighting
- Selecting or Creating Appropriate Music to Communicate Mood, Characters, Plot, etc.
- Examining Genres and Styles
- Exploring Puppetry as a Reflection of a Culture(s)

**Literary Arts**
- Writing: Fiction (science fiction, historical fiction, fantasies, fables, legends, myths, fairy tales, comic books, short stories, plays, operas, dramas)
- Writing: Non-Fiction (memoir, family histories, historical events, biographies, newspaper stories)
- Writing: Poetry (haiku, free verse, rap, sonnet, limerick, cinquain, acrostic, ode, sonnet)
- Exploring Oral Language (oral poetry, raps, rants, storytelling, ballads, folktales)
- Creating Imagery: Simile and Metaphor
- Examining Genres and Styles
- Exploring Literary Arts as a Reflection of a Culture(s)

**Media Arts**
- Creating Film or Video
- Creating for Television: Directing, Lighting, Sound, Script Writing
- Creating Photographs
- Creating with 3-D Printers
- Examining Genres and Styles
- Exploring Media Arts as a Reflection of a Culture(s)
Arts-Integrated Connections

Identifying connections is the first and most critical step in planning arts-integrated instruction.

A connection is created by identifying your specific ARTS FOCUS (e.g., creative movement, rhythm, story theater, collage) and connecting it to a specific EDUCATIONAL area:

1. **Curriculum Area**—a required subject
   (e.g., science, social studies, language arts, math, art form, etc.)

   OR...

2. **Concern/Need**—an issue educators consider important
   (e.g., English language learners, character education, classroom management)

---

**Mutually Reinforcing Connection**

Learning in one area reinforces/extends learning in the other area. Specifically, does the learning in the arts focus reinforce or extend learning in the curriculum area or in the area of concern/need? Conversely, does the learning in the curriculum area or area of concern/need reinforce or extend learning in the arts focus?
CONNECTS AN ART FORM AND ANOTHER SUBJECT

TOPIC = SPECIFIC ARTS FOCUS + EDUCATIONAL AREA

CONNECTS AN ART FORM AND ANOTHER SUBJECT
Objectives

Objectives for instruction are drawn from the Content and Achievement Standards.

An objective is... a statement that describes what the learner will know, be able to do, or appreciate as a result of instruction. Objectives are sometimes known as Expected Results.

Arts integration requires that objectives are met in both the art form and the other subject area. It also requires that the objectives are MUTUALLY-REINFORCING. A mutually-reinforcing connection is achieved when learning in the art form reinforces/extends learning in the other subject area (e.g., science).

Evolving Objectives

e•volve—to develop by gradual changes; unfold

Synonyms: change, grow, progress, advance, go forward, develop

Antonym: regress

Objectives evolve and unfold over time as students’ experience and understandings develop. As students master each objective, they are ready to take on the next, more challenging ones. Teachers monitor student progress and adjust objectives to keep students challenged and interested within a unit or across a year. As students’ mastery grows, so do their feelings of self-efficacy—the belief in oneself and one’s ability to achieve.

The selection of appropriate ACHIEVEMENT STANDARDS allows teachers to “stretch” students and to help them gradually develop deeper levels of knowledge and skill over time.
The Shifting Balance of Instruction

Example: a Series of Lessons in a Unit Integrating Dance and Science

LESSON 1: Only Dance

LESSON 2: Only Science

LESSON 3: More Dance Than Science

LESSON 4: More Science Than Dance

LESSON 5: Dance and Science Balanced

MEETS EVOLVING OBJECTIVES IN BOTH
CONSTRUCT AND DEMONSTRATE UNDERSTANDING

What Is Understanding?

<table>
<thead>
<tr>
<th>Understanding</th>
</tr>
</thead>
<tbody>
<tr>
<td>■ Make sense of many distinct pieces of knowledge</td>
</tr>
<tr>
<td>■ Take facts and skills and use them widely and effectively</td>
</tr>
<tr>
<td>Ability to use (or “apply” in Bloom’s, Anderson and Krathwohl’s levels)</td>
</tr>
<tr>
<td>■ Requires a creative, thoughtful, and active mind</td>
</tr>
<tr>
<td>■ Ability to draw inferences</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Knowledge</th>
</tr>
</thead>
<tbody>
<tr>
<td>■ Facts</td>
</tr>
<tr>
<td>■ Information that is known</td>
</tr>
<tr>
<td>■ Requires taking in and recalling from memory</td>
</tr>
<tr>
<td>■ Usually taught through lecture, repetitive drill, and memorization</td>
</tr>
<tr>
<td>■ Learners simply plug in what is required</td>
</tr>
</tbody>
</table>

### Six Learning Principles

Learning is...

<table>
<thead>
<tr>
<th>1. Actively Built/ Constructed</th>
<th>2. Experiential</th>
</tr>
</thead>
<tbody>
<tr>
<td>The meaning students construct is based on their pre-existing knowledge, understandings, and beliefs.</td>
<td>Engaging students in real-world, authentic experiences is the optimum way for them to learn.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>3. Reflective</th>
<th>4. Evolving</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students need opportunities to think about and make personal sense of new experiences, and to integrate them with past experiences.</td>
<td>For significant learning to take place, students need to revisit ideas, ponder them, try them out, play with them, and revise them.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>5. Collaborative</th>
<th>6. Problem-Solving</th>
</tr>
</thead>
<tbody>
<tr>
<td>Student learning increases when they have opportunities to learn from their peers.</td>
<td>Students learn best when they ask questions, investigate, and use a variety of resources to find solutions.</td>
</tr>
</tbody>
</table>

Adapted from numerous sources including:
## Aligning Beliefs and Approaches to Teaching

Practices are a living expression of your values and beliefs.

<table>
<thead>
<tr>
<th>Beliefs</th>
<th>Consistent Practice</th>
<th>Inconsistent Practice</th>
</tr>
</thead>
<tbody>
<tr>
<td>Learning is actively built/constructed</td>
<td>Students discuss and examine what they already know, understand, and believe as the beginning of their learning experience. Engagement is highly personal.</td>
<td>Students “receive” information from the textbook or teacher. Initial instruction ignores students’ prior knowledge. Literal answers are accepted as evidence of comprehension.</td>
</tr>
<tr>
<td>Learning is experiential</td>
<td>Students engage in hands-on activities supplemented by primary sources. They experience and learn through real world, authentic challenges. Students demonstrate their learning through visual, kinesthetic, dramatic, and other ways.</td>
<td>Students learn mainly from textbooks and worksheets.</td>
</tr>
<tr>
<td>Learning is reflective</td>
<td>Students engage in regular oral and written reflections about what they learned and how they learned it, and what it means to them. Student reflection impacts and guides future instruction. Assessment is part of the learning experience. Student learning is evident in what they say and do.</td>
<td>No time is devoted to regular reflection. Feedback happens only at the end of a unit. Instruction is not altered as a result of responses. Assessment is at the end of a unit through written tests and verbal responses to questions.</td>
</tr>
<tr>
<td>Learning is evolving; Students are thinkers with their own emerging theories about the world</td>
<td>Learning is marked by cycles. Students return to ideas to expand/explore them. Students see mistakes as a part of the learning process.</td>
<td>Information is “covered”—one time through. Students seek single right answers. Mistakes are considered errors.</td>
</tr>
</tbody>
</table>
## AN APPROACH TO TEACHING

<table>
<thead>
<tr>
<th>Beliefs</th>
<th>Consistent Practice</th>
<th>Inconsistent Practice</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Learning is collaborative</strong></td>
<td>Students work in groups. Learners depend on each other’s thinking to enrich their understanding and construct meaning. Students are constantly engaged in purposeful conversation.</td>
<td>Students are engaged mostly in individual learning. Desks are organized in rows facing teacher and not each other. The classroom is silent. Conversation is perceived as disruptive and “cheating.” Students are required to raise their hands to speak, usually in response to the teacher’s questions.</td>
</tr>
<tr>
<td><strong>Learning is problem-solving</strong></td>
<td>Students create their own solutions. Students make choices and evaluate the results. Questions have more than one right answer. Students are supported and feel safe to freely explore. They get regular, supportive encouragement. Teacher’s physical proximity to students and language demonstrates respect for all students.</td>
<td>Instruction focuses on repetition and drill. Teachers provide the answers; students copy the teacher’s solution. Use of worksheets, fill-in-the-blank forms. Rewards and punishments are linked to learning. Atmosphere is guided by fear of being wrong. Teacher is physically separate from students and language is not respectful.</td>
</tr>
</tbody>
</table>
An Arts-Integrated Approach to Teaching

A consistent Traditional approach to teaching

A predominantly Traditional approach to teaching that occasionally includes some Constructivist teaching techniques

A predominantly Constructivist approach to teaching that occasionally uses some Traditional teaching techniques

A consistent Constructivist approach to teaching

The ARTS have a place in classrooms where teachers use any approach to teaching.

However, effective ARTS INTEGRATION requires a consistent Constructivist or predominantly Constructivist approach to teaching.
### Approach to Teaching

1. Are the six learning principles of Constructivism (actively built, experiential, evolving, collaborative, problem-solving, and reflective) evident in my lesson?  
   - Yes  
   - No

### Understanding
